PTA Landscapes is a full service landscaping business with over 30 years of experience building educational environments. PTA Landscapes, can consult, design, administer, construct and maintain your schools landscape. PTA Landscapes price themselves on helping schools make their landscaping requirements a reality, on time and on budget.

Leaders in the industry, PTA Landscapes are highly experienced in undertaking projects for educational institutions. Landscaping for educational institutions involves substantially more than paving an area, or planting trees and vegetation for decoration. Today, consideration must be given to water conservation, environmental issues, user safety, budgeting, cost control, long-term maintenance and quality construction.

PTA Landscapes has developed a unique **Educational Institution Landscape Package** to simplify what can be a time and resource consuming project. This simple three-step process will deliver exceptional results and give you and your team complete confidence that the project will meet the school's budget. The project will be managed from start to finish by one team which eliminates the coordination of multiple contractors.

If your school already has a design master plan - PTA Landscapes are experienced in implementing and constructing from these plans.

Catholic Regional College - St Albans

STEP ONE

Canterbury Girls Secondary College - Canterbury

CONSULTATION

After initial contact has been made with PTA Landscapes, one of their senior staff members we will arrange to meet with you at your school grounds to discuss your project and complete a thorough site analysis.

At this point a Project Manager will discuss in detail the following about the project:

- Budget
- Design requirements
- Functionality
- Timing
- Accessibility
- Review existing services
- Sustainability
- Aesthetics
- Maintenance requirements

On conclusion of the site consultation PTA Landscapes will prepare a fee proposal based on the discussions and requirements as outlined in the consultation.

Marian College - Sunshine

Santa Maria College - Northcote

Mercy College - Coburg

CONSULTATION

Optional Master Planning

Depending on your school's stage of development, you may consider having PTA Landscapes complete an external master plan. Master Planning allows you and your school to plan, budget and stage for future works whilst maintaining a consistent style and material palette throughout the campus. Master Planning avoids mismatch of individual projects which do not work in conjunction with one another and ensure a coherent approach. It also allows for the development of areas as stand alone projects that can be staged over several years to fit into budget constraints.

Grovedale College - Grovedale

STEP TWO

Glen Orden Primary School - Werribee

SURVEY AND DESIGN

CRC - St Albans

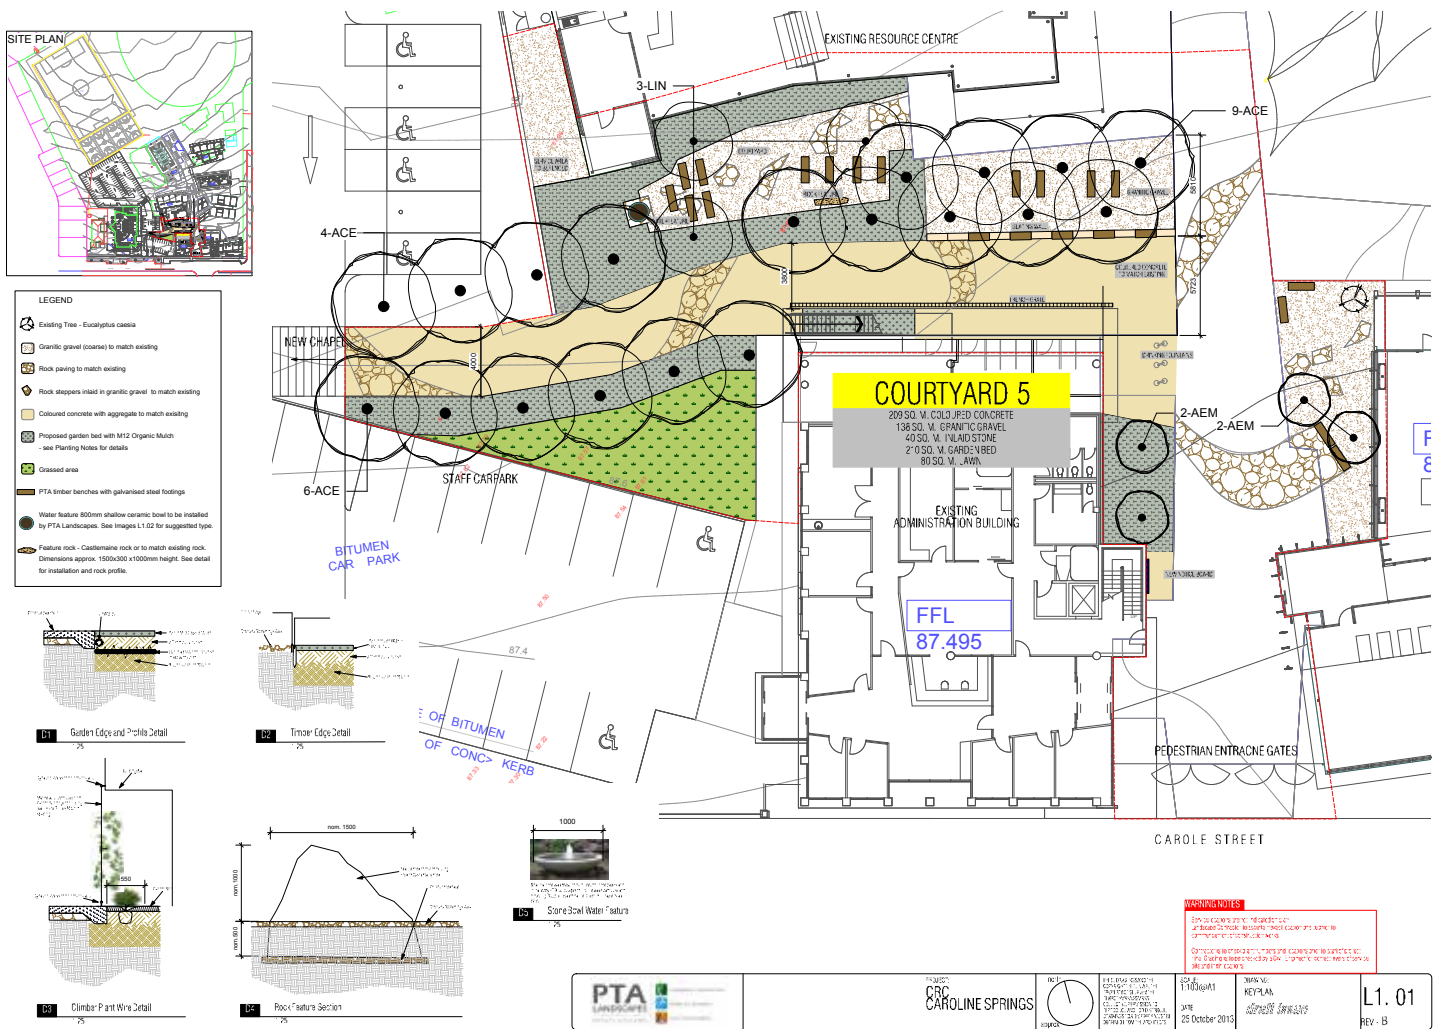

PTA Landscapes will survey the school to compile a drawing of existing conditions; this is an essential element to the design process.

This feature survey identifies:

- All existing features, buildings, structures and elements.
- Spot levels throughout the school indicating level changes.
- Pits and services.
- Existing vegetation, materials and surfaces.

Marian College - Sunshine

STEP TWO - SURVEY AND DESIGN

SURVEY AND DESIGN

Using all the information gathered from the consultation and the feature survey a landscape design is prepared. These drawings include landscape plans and details showing overall lay outs, set outs and specifications for construction. Materials palettes and planting plans are produced along with any other relevant documentation required for the works. These are all put together and set out so they are easily read and understood. The landscape design is quantity surveyed and priced by the PTA Landscapes' estimating team to produce a detailed cost analysis for the proposed project. This process ensures the landscape design to be implemented meets all the school's requirements especially budget.

Once finalised PTA Landscapes will provide a presentation with all of the designs.

STEP THREE

CRC - St Albans

CONSTRUCTION

Once plans and associated costs are approved, PTA Landscapes will then proceed to the construction stage of the three-step process. All administration, management and construction will be carefully followed through to completion and final handover.

PTA Landscapes pride themselves on a quality driven approach, coupled with an unrivaled expertise and attention to detail. All projects regardless of their scale are delivered on time and budget with a quality guarantee.

EXPERTISE

The team at PTA Landscapes consists of numerous qualified landscape specialists; irrigators, concreters, carpenters, horticulturists and machine operators all work closely with consultants to produce the best outcome for your project. The company has various vehicles, machines and tools at its disposal to suit any situation as well as an extensive list of trusted suppliers with long standing relationships. PTA Landscapes pride themselves on a quality driven approach, coupled with an unrivaled expertise and attention to detail.

Whether your need is to upgrade to a tiered area, a playground, or a central plaza precinct, all work is carried out and supervised by the PTA Landscapes' experts. Regardless of the project size, the quality of all PTA Landscapes' projects are guaranteed and delivered on time and most importantly on budget.

PTA Landscapes has transformed our yard into a welcoming and aesthetically pleasing space. The design is robust, works intuitively, makes maximum use of limited space and has had a very positive effect on the way students interact in the yard. What they've achieved is beyond what we'd hoped.

Christina Utri Principal - CRC St Albans

PREVIOUS PROJECTS

CATHOLIC REGIONAL COLLEGE ST ALBANS

The Catholic Regional College (CRC) in St. Albans appointed PTA Landscapes to design and construct an ongoing series of landscape projects.

The expert team at PTA Landscapes was able to supply a complete solution from initial concepts through to design, site development, construction and beyond. Ongoing advice and assistance was provided to the school throughout each of these stages irrespective of the available funding.

Some of the landscape works so far have included weather proof shelters, attractive and functional seating solutions, lighting, drinking fountains, bins, flag-poles, asphalt and concrete paving, a performance stage, basketball half courts and garden beds with dynamic planting schemes.

Modern materials combined with sustainable planting and water management systems have enhanced the schools' usable outdoor areas to add obvious value to those who use and visit the campus.

EXPERIENCE

PTA Landscapes is an award winning full service landscape construction company committed to effectively interpreting the creative vision of school boards and educational committees.

PTA Landscapes have completed many educational environment projects for the institutions below.

TESTIMONIALS

“PTA Landscapes have completed extensive landscaping work at Catholic Regional College Caroline Springs. The work they performed was of an exceptionally high standard and has made a great improvement to the College. The staff are very professional and knowledgeable and consulted extensively with us during all stages of the process. I would highly recommend PTA Landscapes.”

- **Kate Dishon** Principal - CRC Caroline Springs

“PTA Landscapes have transformed our VCE centre. What was once an old shed is now a bright and inviting outside learning space that provides our VCE students with an area they feel comfortable and relaxed in. They are able to work in small groups and collaborate. The staff at PTA Landscapes were fantastic to work with and listened to our feedback and worked within our budget to exceed our expectations. The team at PTA Landscapes managed the whole process and worked with the school in developing an outstanding learning space.”

- **Davin Reid** Assistant Principal - Grovedale College

SENIOR TEAM

PAUL TROTTER

Managing Director

Paul started PTA Landscapes over 30 years ago and currently employs a team of around 20 full time staff. Paul is a well known and respected person within the landscape industry and his advice is often sought after by landscape architects and consultants.

Experience

Managing Director, PTA Landscapes,
30 Years
Oversees the company's direction and management

Education/Training

Certificate of Landscape Technology -
